

Assyx GmbH & Co. KG, 56626 Andernach, Germany

## Proven production pallets can be inspected in close detail at the bauma 2013

Assyx GmbH & Co. KG from Andernach, Germany, will present the Assyx DuroBoard at Booth 326 in Hall C1 at the bauma in Munich from 15 to 21 April 2013. The high-quality production pallet is used in the manufacture of concrete products and is enjoying increasing popularity with producers.

Assyx will present the Assyx DuroBoard to the international trade visitors once again in 2013 at the bauma in Munich, the internationally leading trade fair for construction and building material machines as well as construction vehicles and construction equipment. At the world's largest trade fair the visitors will be able to inspect the innovative production pallet in close detail and see for themselves the various advantages of the product.

"The material properties of the DuroBoard and thus the quality and longevity are convincing an increasing number of concrete plant operators. The structure of the DuroBoard is exemplary and has set a new standard as a pioneer. The close co-operation with Bayer MaterialScience AG in the development of the DuroBoard has absolutely paid off", explains Alfred Rochlus, Assyx managing director with responsibility for international sales.

### Productivity and quality convince

The Assyx DuroBoard, which has been produced in Andernach for seven years now, has proven itself in practice and is very well-known in expert circles. That is also the case at Rünz & Hoffend KG in Urmitz. The company produces 180,000 m<sup>3</sup> of high-quality, thermally insulating wall-building materials annually in the fully automated production plant.

Works manager Roland Neumann values the advantages: "We have been using the DuroBoard for nearly seven years. Compared with our old pallets, the use of the DuroBoard has paid for itself from the very first day due in particular to the higher productivity and the better quality of the block products, plus the very long service life of the production pallets from Assyx."

### In use all over the world

Today more than 300,000 of the production pallets are in use worldwide. In addition to the German and Central European

Roland Neumann, sales manager at Rünz & Hoffend KG (right) and Assyx managing director Alfred Rochlus inspect the production pallets. 15,000 DuroBoard production pallets have been in continuous use in the automatic production machines of the building material manufacturer since 2006 and provide for trouble-free processes.

market, Assyx has also succeeded in the past few years in winning over the Middle East and has become an important supplier in Kuwait, Dubai, Oman and Saudi Arabia. Alfred Rochlus says: "Last but not least, the bauma is of interest to us because of this year's trade fair partner country, Indonesia. The largest of the South-East Asian countries offers enormous potentials with its booming building industry."
